

## GO FLUSH GAME

## GAME LEARNING CENTER EVALUATION

**Objective:** To test understanding of wastewater terms

**Background Ref.:** Student Sheet - The Facts About Wastewater Treatment; IV

**Subject:** Science

**Skills:** Recall, Observation

**Materials:** Index Cards

**Procedure:**

1. Copy the game cards and have students glue them to index cards
2. Follow directions to play the game (just like Go Fish).

To learn more about wastewater cut out the cards on next page and play Go Flush.

### HOW TO PLAY

It is played just like Go Fish. Each player receives five (5) cards.

Half of the cards have questions. The other half of the cards are the answers to questions. The person to the left of the dealer goes first. They ask any player if they have the answer or the question to one of their cards. If the other player does have the correct card they give it to player # 1. If the other player does not have the correct card, they put the pair down and go again. But if they don't make a match, the person to the left takes their turn. The first person to match all their cards is the winner.

See game  
pieces on  
next page.
