45 Years of Environmental Progress

Association of Environmental Authorities

2333 Whitehorse-Mercerville Road, Suite 2, Mercerville, New Jersey 08619

Phone (609) 584-1877 • FAX (609) 584-8271

Website: www.aeanj.org

Insight. Expertise. Innovation.

We deliver on your environmental challenge.

Providing solutions in:

Wastewater Engineering

- Optimization, Upgrade and Expansion Studies
- Design and Construction Management
- Operational Support and Process Troubleshooting

Regulatory Support

- NJPDES Permitting
- Water Quality, Mixing Zone, and TMDL Studies
- Wastewater Management Plan

Stormwater Management

- Stormwater Permitting
- Hydrologic Modeling
- Best Management Practice Design

Kleinfelder (formerly Omni Environmental) architects, engineers, and scientists have a full range of capabilities to develop safe, sustainable environmental solutions to secure the health and economic well-being of your community.

AEA Serves Members Who Serve the Public

The AEA was established in 1971, under the name “The Authorities Association of New Jersey” as a trade association of managers from water, wastewater and solid waste authorities. Its aim was to establish a vehicle for communication and shared action to help authorities comply with increasingly complex financial and environmental regulation. In 1990, AANJ became the “Association of Environmental Authorities.” AEA leaders chose this name to clarify the distinction between AEA members—*environmental* authorities and municipal utilities which deal with water, wastewater and solid waste—and other types of New Jersey non-environmental “authorities.”

The mission of AEA from its inception has been to deliver information, education and advocacy programs and services that help member organizations provide excellent service to ratepayers. AEA has also worked hard to help the public understand and value the work of its member organizations. Its Associate Members comprise a vital and valued contingent within the overall membership. Today, AEA members deliver clean water and solid waste service to more than eight million New Jerseyans. More than 4,000 men and women work in the public utilities authorities and municipal utilities that belong. The association is governed by a Board of Directors and Executive Committee. Financial and Audit Committee oversee AEA financial matters. Other committees focus on areas of concern to members: Coastal, Energy, Ethics, Human Resources, IT, Legislative, NJPDES, Preparedness, Solid Waste, and Water. In all, more than 120 individuals, including commissioners, executive directors, authority and utility department staff, engineers, financial advisors, and attorneys, participate in the AEA Board and its committees. New members are always welcome, and new committees can be formed as needs arise.

Here are a number of ways AEA serves its members:

- **Continuing education.** We hold two conferences, participate in the September NJWEA conference, and present workshops throughout the year so that members can obtain necessary licensing credit and stay abreast of new developments, technology and management topics.
- **Commissioners.** The association publishes a Handbook CD for authority commissioners, which provides background information for the new commissioner and new executive staff.
- **Legislative advocacy.** Each legislative session about 200 bills are introduced that have an impact on AEA members. AEA comments and testifies on bills as they move through the process, and we develop strategies to address legislation.
- **Regulatory advocacy.** When developing regulations is the topic at NJDEP, AEA is there, providing the perspective of the regulated community it represents.
- **Compliance.** When new laws and regulations come out, AEA helps members understand how they will be affected.
- **Public policy.** AEA participates in councils, forums, and events that shape public opinion and influence opinion leaders, political folks, the media and other important audiences.
- **Information.** E-News, a compendium of timely announcements, event notices, and links to NJ-specific water, sewer and solid waste news, arrives in Inboxes regularly. Three times yearly, AEA publishes Authority View, which is packed with information and advice from colleagues and recognized experts. The AEA website, www.aeanj.org, and its Facebook page are online sources of news and information for both members and the public. You can also follow us on Twitter — @AEANJcleanwater.
- **Recognition.** AEA highlights excellence each year in its Wave Awards program.

Atlantic County

Three time winner of national taste contests. Operates the "Water Works" made famous by the game Monopoly. The system is made up of a Cohansey well field, Kirkwood well field, two 250 million gallon reservoirs, a 24 mgd water filtration plant, a 33 mgd pumping station, two 48" transmission mains, one (1) aquifer storage and recovery well, and a water distribution system of over 140 miles of water mains. The system serves Atlantic City plus bulk sales to New Jersey American Water.

Seven Board of Directors
Atlantic County

The Atlantic County Utilities Authority is charged with providing responsible waste management services to protect local waters and lands from pollution, but has gone far beyond its mandate with renewable energy and alternative fuel projects.

ACUA's Wastewater Division serves 14 municipalities. The wastewater treatment system consists of a 40 mgd regional wastewater treatment facility, 20 pumping stations, and more than 60 miles of interceptor sewers and force mains. The treated effluent is discharged via an outfall line 8,700 feet out into the Atlantic Ocean. Sludge is dewatered and disposed of onsite by incineration. ACUA also accepts outside dewatered sludge, leachate, liquid sludge and septage. ACUA maintains a New Jersey State certified water and wastewater environmental testing laboratory. The highly trained laboratory staff provides analyses which are used in establishing operational and process control. These analyses ensure that the plant is meeting all environmental quality standards set by the NJ Department of Environmental Protection. Laboratory services are also offered to public entities such as public health departments, water utilities, wastewater utilities, school districts and others.

In addition to the wastewater treatment facility in Atlantic City, home to the Jersey Atlantic Wind Farm and a large solar project, the ACUA's Solid Waste facilities are located on Delilah Road in Egg Harbor Township at the 360-acre Haneman Environmental

Park. At this site, ACUA operates a landfill, compost site, transfer station, maintenance center, geothermal administration building, and landfill gas-to-electricity project, as well as a compressed natural gas (CNG) station, a biodiesel fueling station, electric vehicle charging stations, and a "green" vehicle wash. ACUA also hosts a single-stream recycling processing facility, which is owned and operated by its partner, ReCommunity, at this location.

Since its inception, ACUA has become a recognized leader in alternative energy and environmental innovation. Some of ACUA's initiatives include a 500-kW solar project and the 7.5-MW Jersey Atlantic Wind Farm at the wastewater treatment plant, a landfill gas-to-energy project and the area's first publicly accessible Compressed Natural Gas fueling station in Egg Harbor Township. ACUA is transitioning its biodiesel collection fleet to CNG and continues to build its fleet of zero-emissions electric vehicles. ACUA is also partnering with Viridity Energy to install one megawatt of battery storage at the wastewater facility.

In late 2012, ACUA took ownership and responsibility for the Pinelands Park Landfill in Egg Harbor Township. This unique arrangement enabled ACUA to retire \$28 million in solid waste debt and stabilize finances while ensuring the closed landfill will be safely monitored and maintained in the future.

ACUA is Atlantic County's shared service authority and offers municipalities, government agencies, schools and businesses a number of services including, but not limited to: collection of recycling, trash, bulky waste, and yard waste; street sweeping services, sludge hauling, lab services, pump station maintenance, grease recovery, and access to the compressed natural gas station.

ACUA keeps Atlantic County clean and green through groundwater protection and responsible waste management including single-stream recycling, household hazardous waste disposal and its Clean Communities adopt-a-road program. ACUA works to educate the community about environmental protection and renewable energy through presentations, tours, community events and a strong social media presence.

 Five Commissioners
 Ocean County

The Authority provides potable water to the residents of a bayside community within Berkeley Township. The treatment plant consists of six rapid sand pressure filters and an automatic flow paced disinfection system. The treated water from three on-site wells is stored in two water storage tanks with a total capacity of 1.4MG. Eight employees proudly service a distribution system of approximately 319,800 linear feet of 6" to 16" diameter mains.

 Seven Board Members
 Atlantic County

The Borough of Buena Municipal Utilities Authority is located in the most western part of Atlantic County, New Jersey which is comprised of 7.9 square miles.

The BBMUA was created as a political subdivision of the State of New Jersey by Ordinance of the Borough of Buena on December 23, 1963. The Authority was created to install, construct, finance and maintain the operations of a sewerage system in the Borough of Buena. The Authority's sewer treatment plant was fully operational in July 1969.

Later in the early 1980's the Authority received a grant from the NJDEP along with other funding which helped to finance a water supply system for the Borough of Buena. On September 20, 1985 the Authority began providing water service to the area.

Currently the BBMUA has five sewer pump stations and three water wells. These pump stations and wells allow the BBMUA to service portions of Minotola, Landisville, and Buena as well as a small part of Buena Vista Township with sewer and/or water services.

The Borough of Buena Municipal Utilities Authority's mission is to provide the best service to our water and sewer customers in a cost-effective manner while protecting the environment. We are utilizing the most up to date treatment methods to attain the limits set upon us by the NJDEP and The Pinelands Commission.

Nine Commissioners
Hudson County

The HCIA is an autonomous public authority with broad responsibilities in many fields. The Authority serves as the implementing Agency for the County's Solid Waste Plan and under that plan the Agency ensures that all solid waste facilities, haulers, and businesses comply with all County and State regulations. To complement the Solid Waste Management Program, the Authority offers a vast array of Environmental Programs, including a countywide recycling educational program, Household Hazardous Waste collection and Clean Communities' programs. In addition to their Environmental Programs, the Authority provides oversight of the County's Transportation Management Association (TMA) whose primary mission is to promote mass transit. As the County continues to grow, the Authority's Office of Planning and Energy fosters responsible development and has instituted a countywide solar initiative. Public financing is another component, whereby municipalities are offered low interest financing for public initiatives. The Authority is also responsible for managing a multitude of recreational facilities.

LEADERSHIP IN ENVIRONMENTAL AND REDEVELOPMENT LAW, LITIGATION & NOW *CLIMATE CHANGE RESILIENCY*

Recognizing the ever-increasing challenges that our local government entities face as the result of extreme climate forces affecting public health, safety and the environment, Maraziti Falcon, LLP has developed a practice area devoted to assisting our clients to increase resiliency and strategically plan for a changing climate.

Extreme weather conditions and excessive regional, local and coastal flooding and storm surges threaten infrastructure, transportation and our clients' ability to protect assets, resulting in a need to adapt governance to meet these challenges and revise existing policies and ordinances to better protect against the adverse effects of these life-altering events.

This practice area complements Maraziti Falcon's existing practice devoted to the counseling of public and private entities regarding environmental, redevelopment, land use law, government, construction law and litigation.

Five Commissioners
Hudson County

The North Bergen MUA consists of approximately 80 union and non-union, civil service employees. It provides wastewater collection and treatment services for the Townships of North Bergen, Guttenberg and a small portion of Union City. Approximately 3-mgd is collected from Guttenberg and the north-eastern portion of North Bergen and treated at the Woodcliff Treatment Plant. The remainder of North Bergen's wastewater, approximately 7-mgd, is collected and pumped to the Passaic Valley Sewerage Commission in Newark for final treatment. The combined sewer system includes 34 regulators, 4 pump stations and 10 CSO netting facilities that capture approximately 35 tons per year of solids and floatables. The MUA is also responsible for the collection and transporting of 40 million pounds of household waste per year from the township of North Bergen in addition to 5 million pounds of recyclable materials.

Seven Commissioners
 Covering parts of Bergen, Essex, Hudson, Passaic and Union Counties
 The PVSC wastewater treatment facility is a pure oxygen activated sludge secondary treatment plant designed to achieve an average effluent carbonaceous biochemical oxygen demand (CBOD5) of 24 mg/L and an average effluent total suspended solids (TSS) of 30 mg/L. It utilizes wet air oxidation and filter presses for biosolids treatment and dewatering to produce a Class A product for beneficial reuse. PVSC operates and maintains infrastructure including the 330 million gallon per day Newark Bay Treatment Plant and a 22-mile interceptor sewer, serving approximately 1.5 million people in 48 municipalities. PVSC also accepts and treats non-hazardous liquid wastes from both inside and outside its treatment district by truck and barge.

As a delegated agency, PVSC permits, monitors and has enforcement authority for approximately 210 significant Industrial Users (SIUs) and over 5,000 commercial businesses. PVSC's Industrial Pretreatment Program also includes an extensive fats, oils and grease management compliance and enforcement section. PVSC's River Restoration Program includes the operation of a skimmer vessel to remove floatable debris from the Passaic River and the Newark Bay. PVSC also sponsors and conducts shoreline debris cleanups within the district. PVSC's pollution prevention efforts also include an Education and Outreach Program targeted at elementary school aged students.

The SMRSA is a regional system serving the Monmouth County communities of Belmar, Lake Como, Sea Girt, Spring Lake, Spring Lake Heights, Manasquan, Brielle and Wall Township.

Designated as a climate ready water utility, the Authority operates an award winning 9.1 mgd tertiary treatment facility/wastewater collection system that is continually updated for maximum efficiency in operations and customer cost containment.

In 2012, the Authority commissioned its Sea Girt Pumping Station, a first in the nation aesthetically designed mobile enclosure nationally recognized as a model for Best Management Practice for Sewerage Authority infrastructure resiliency, and utilizing the design concept, commissioned its Pitney Avenue (Spring Lake) Pumping Station in 2015 acknowledged by the New Jersey Department of Environmental Protection and the New Jersey Environmental Infrastructure Trust as a best management practice for mitigation of damages during a flood event. In 2014, the Authority was an award recipient at the Governor's Environmental Excellence Awards Ceremony in the Innovative Technology Category.

The SMRSA promotes a workplace in which cooperative management and union relations increase the value of the Authority by providing employees advancement opportunities, and a sense of importance, pride and accomplishment.

The Treatment plant campus regularly provides public information and offers educational tours to public officials, environmentally concerned citizens, and students of all levels expressing their interest in preserving our environment.

SMRSA remains committed not only to its primary mission of abating water pollution and preserving the area's vital environment, but continues to leave its mark in making incremental steps towards a greener planet.

The Vernon Township Municipal Utility Authority operates the sewer collector system franchise for the Township of Vernon. The system has within its infrastructure 3 major pump stations and five lift stations currently. This system sends its affluent to the Sussex County Municipal Utility Authority for treatment. In return clean water is returned to Vernon and pumped back into the underground aquifer.

The customer base is currently 1750 and they are billed quarterly using an EDU methodology.

The staff utilized by the Authority to manage both the administrative and functional responsibilities of the sewer system is obtained from the Township of Vernon through an inter-local services agreement. Therefore the only full time employee of the Authority is its executive director. The authority's administrative staff, field personnel and CFO are all obtained by these inter-local service agreements.

Website: www.db-eng.com

D&B Engineers & Architects, P.C. (D&B) was founded in 1965 with a primary focus on wastewater engineering. Today, D&B is a full service firm of Engineers, Architects, Construction Managers, and Scientists that specializes in municipal and environmental engineering. We have supported hundreds of public and private clients on thousands of projects with budgets ranging from several thousand dollars to over \$500M. Our firm has planned, designed and performed construction management on thousands of public works projects, and has succeeded in having repeat clients over its almost 5 decades of service. In fact, D&B recently celebrated our 50th year in business!

Since 1965, D&B has a long and proven track record of developing innovative solutions to meet our clients needs in the following areas:

Wastewater Management, Water Supply Engineering, Hazardous Waste Site Investigation/Remediation, Hazardous Waste Management, Multimedia Environmental Compliance, Environmental Assessment and Permitting, Phase I/Phase II Environmental Site Assessments, Solid Waste Management and Recycling, Civil/Site Engineering, Storm Water Management, Construction Management & Multi-Disciplined A/E Projects and Architectural Services.
